PLATFORM OVERVIEW

The Omnissa platform

Enable autonomous, human-centric digital work experiences that adapt to the way people work

Work continues to evolve dramatically. IT teams supporting flexible, hybrid work environments struggle with fragmented technologies, reactive security processes, heavy manual operations, and talent and skill shortages.

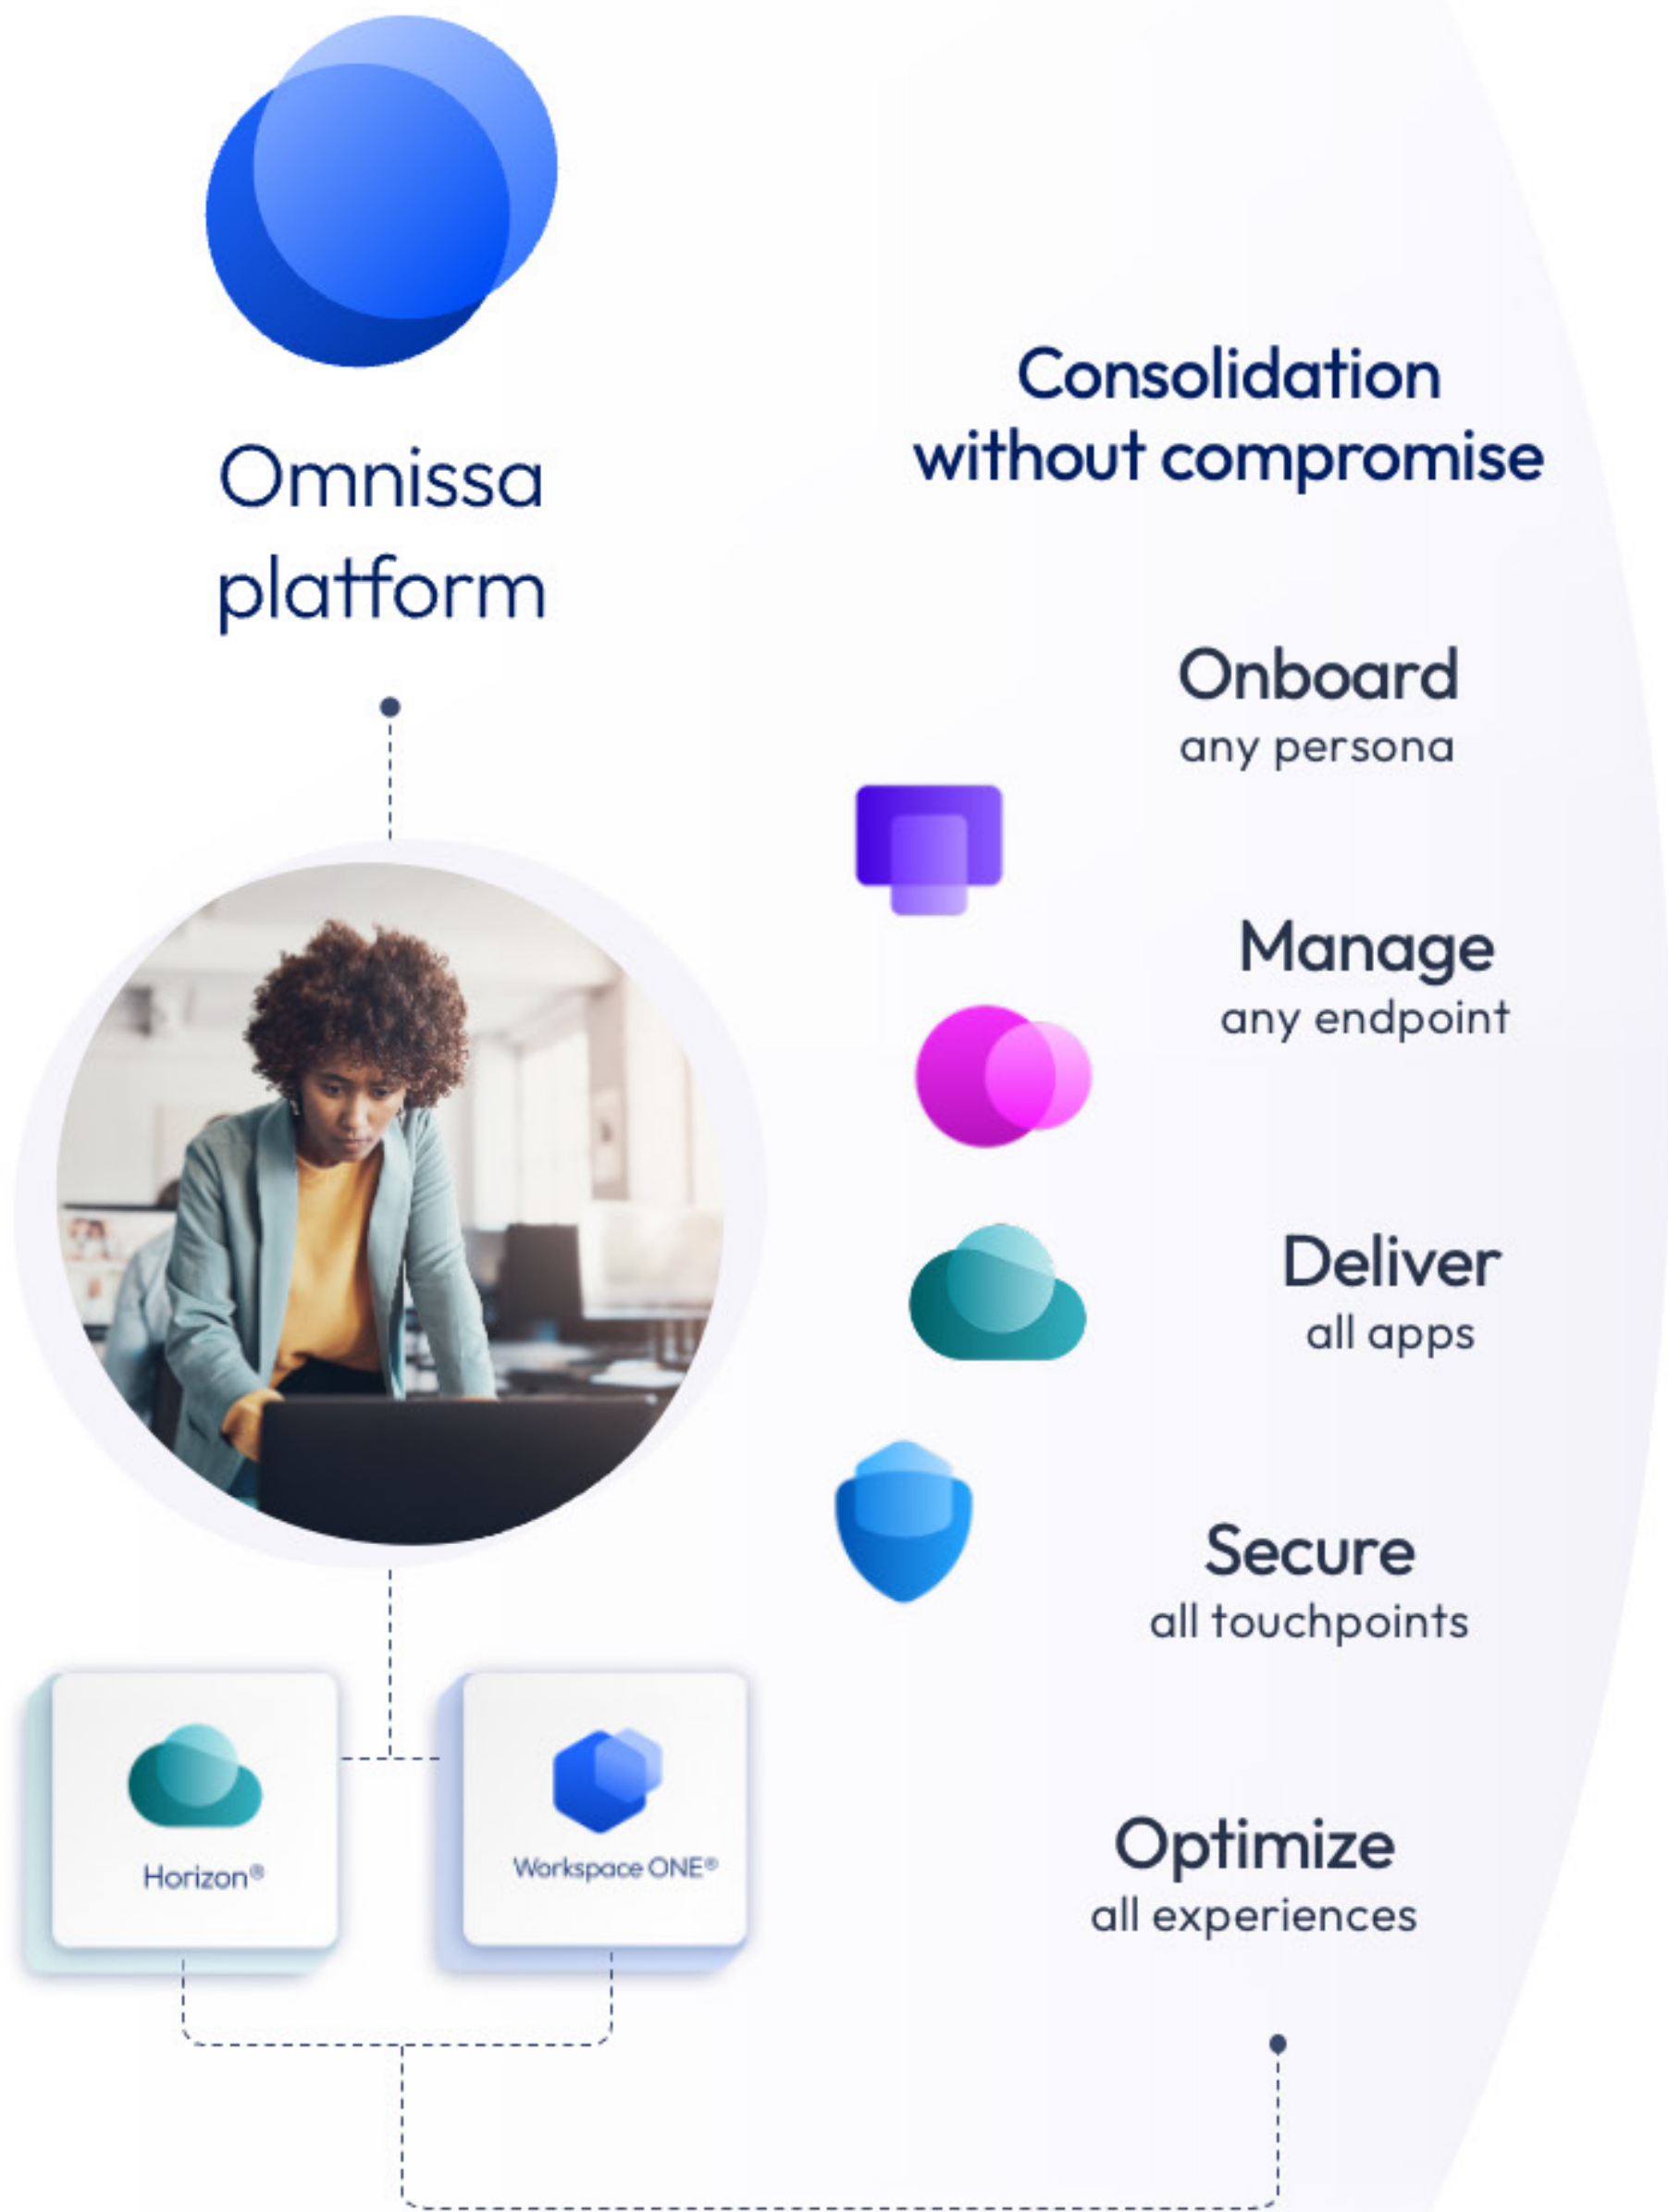

And now, AI adoption by employees is accelerating a second wave of IT consumerization—potentially more disruptive than the mobile revolution of the early 2000s.

Caught between maintaining the complex patchwork of legacy systems and keeping up with AI trends, many organizations are losing sight of what matters most: the human experience.

It's time to re-center digital work around your employees – your “human resources” – with a digital workspace that enables end users and your IT team to drive your business forward.

Industry-leading EUC solutions plus AI-driven core capabilities within an integrated ecosystem.

A platform purpose built to drive simplicity, speed, and scale

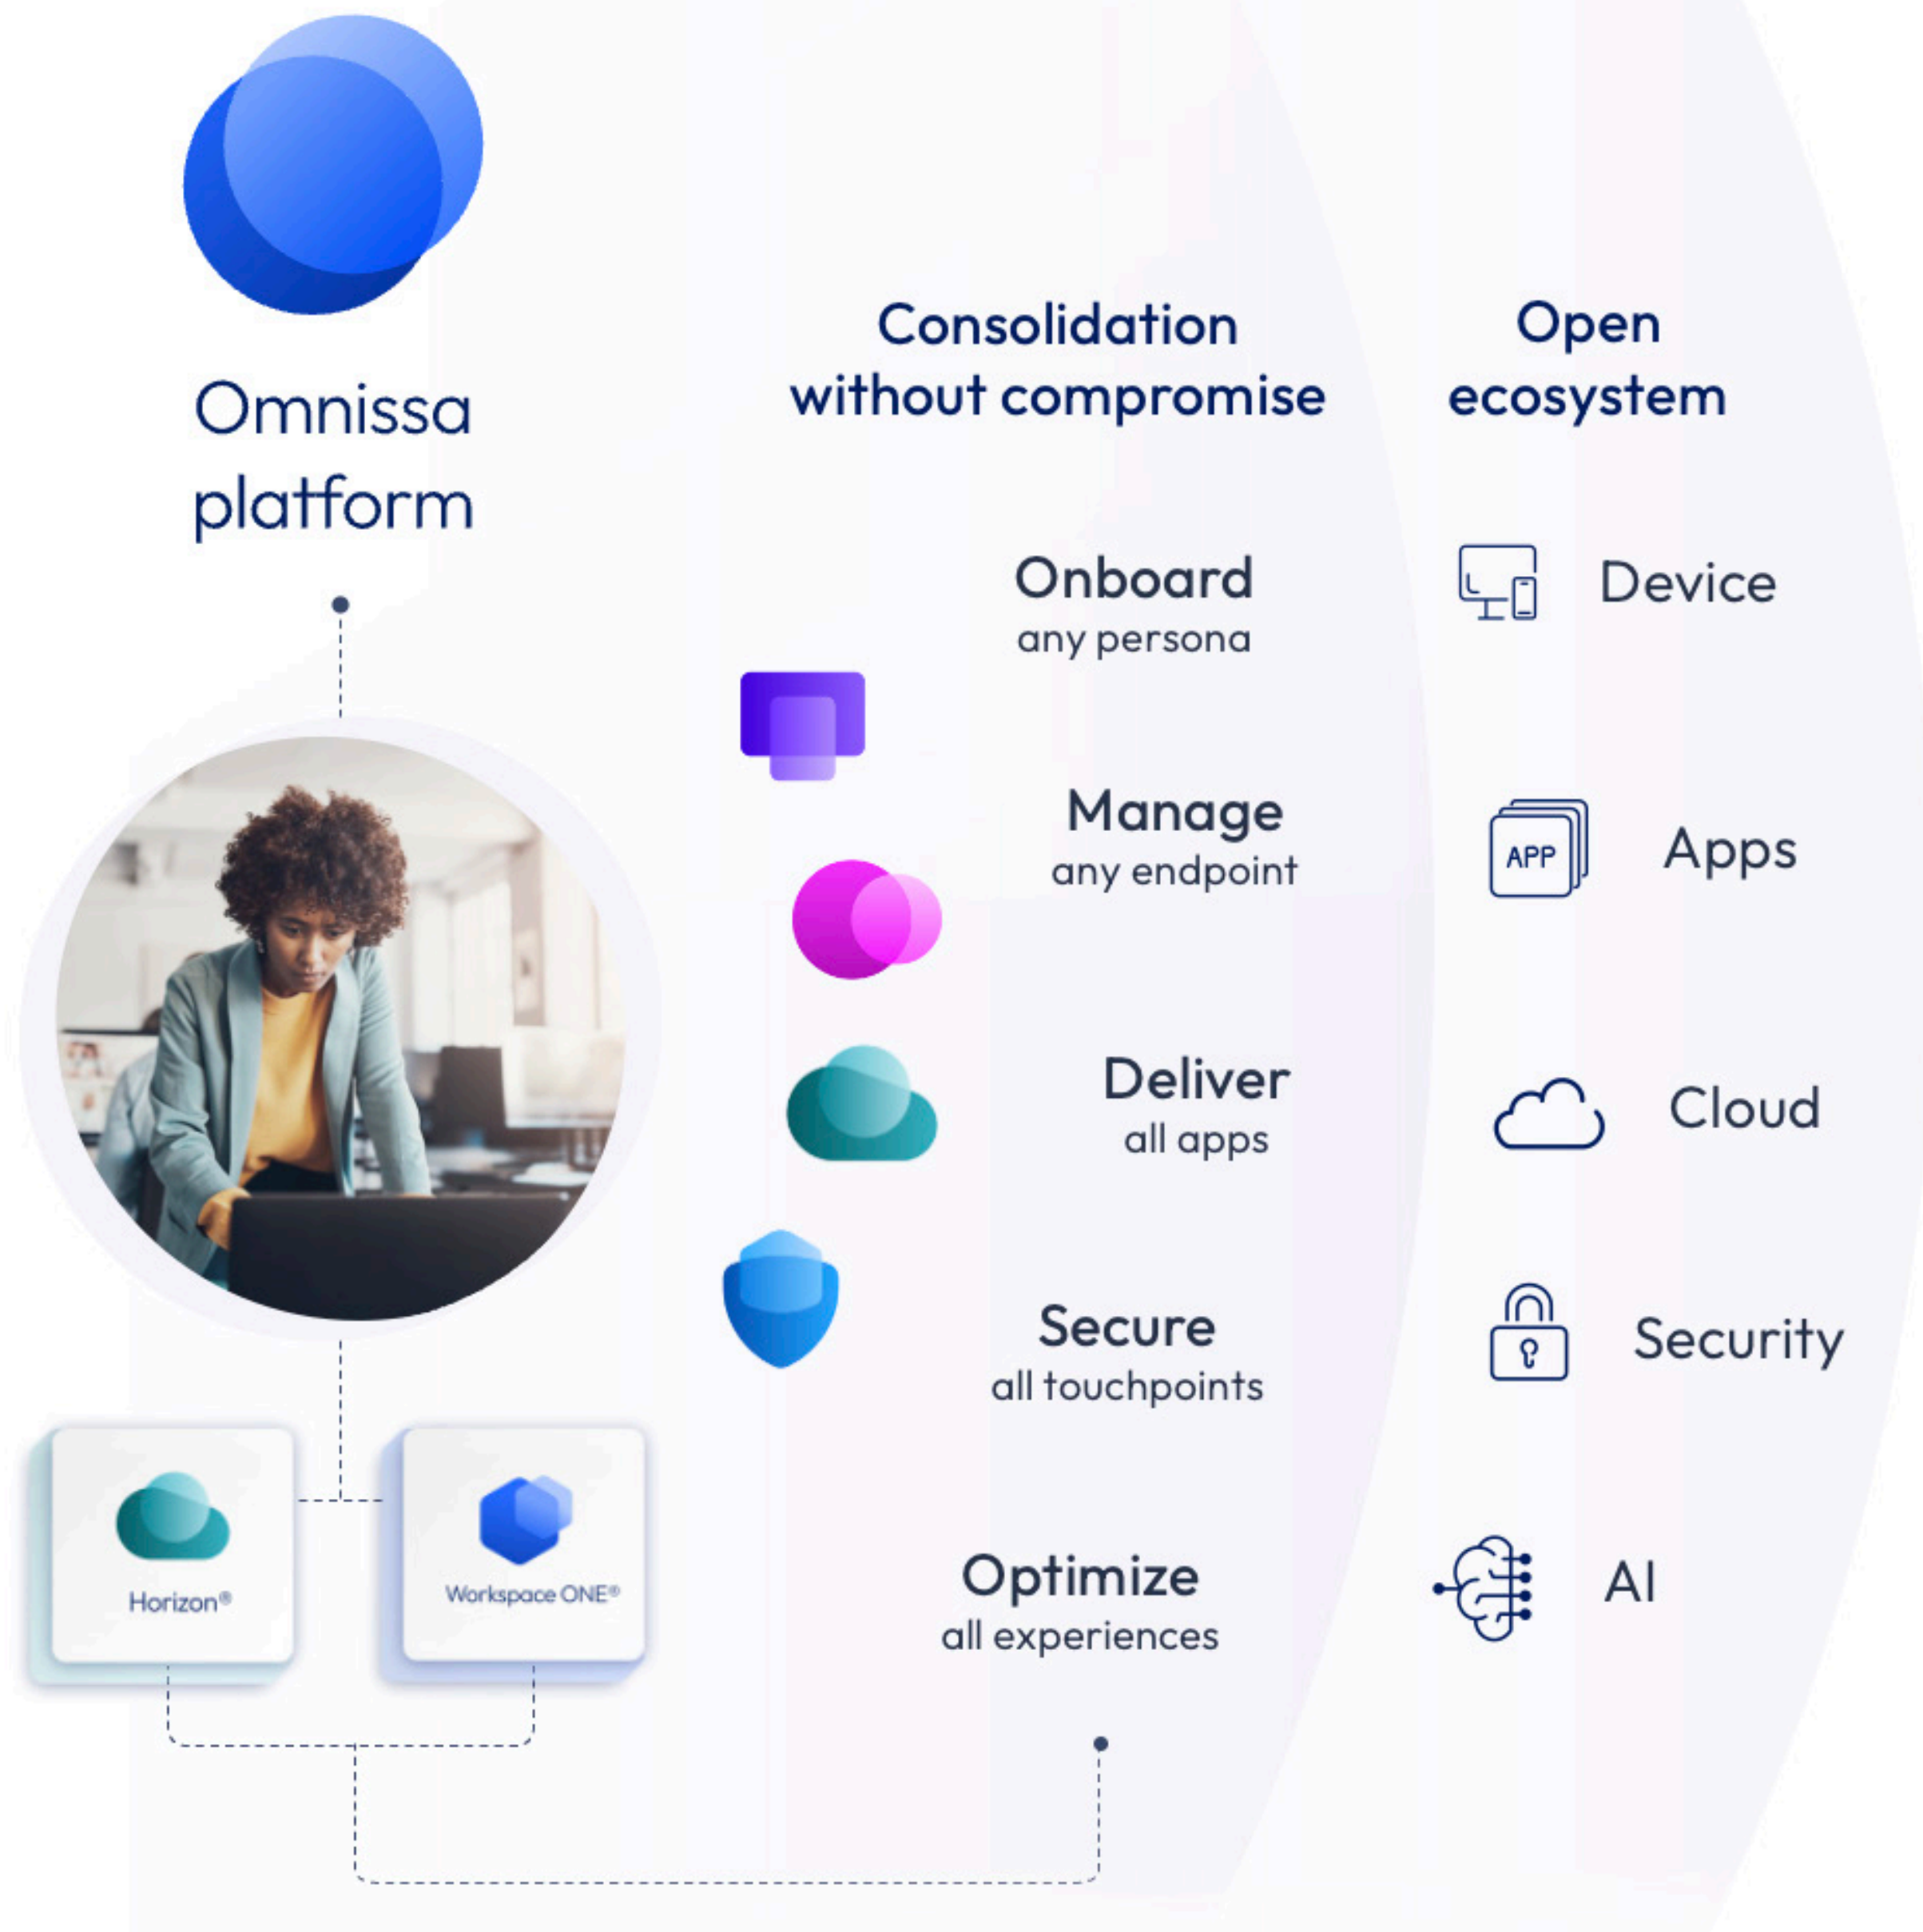

The Omnissa platform brings focus back to people and how they work, providing the tools and experiences they need to succeed. It is built on three key principles to drive maximum value for customers:

- Consolidation without compromise
- An open and integrated ecosystem
- AI-driven core capabilities

Consolidation without compromise

A comprehensive suite of industry-leading EUC solutions – all in one platform

- Eliminates tool sprawl and optimize IT operations
- Provides unmatched breadth and depth across any user persona, devices, apps, and cloud
- Manages solutions across cloud, on-premises, hybrid, and sovereign deployments

Open and integrated ecosystem

An open platform enables a collaborative ecosystem across device, app, cloud, security, and AI

- Protects against vendor lock-ins, while maximizing the value of existing EUC investments
- API rich platform integrates existing EUC tools for policy orchestration, signal sharing, and remediation workflows
- Maintains customer choice, enabling adoption of best-of-breed technology

Hyper-automation

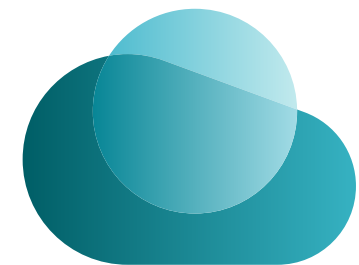

AI-driven core capabilities

A connective tissue across the platform, powered by AI, delivers proactive outcomes to improve scale and speed

- A modern, centralized command layer provides guaranteed resource delivery
- Diverse, rich telemetry from multiple sources that feeds into a powerful data science engine
- Desired state compliance, continuous observability, and context-aware remediations drive EUC security hygiene
- Human-aware agentic workflows serve as a trusted analyst, advisor, and peer

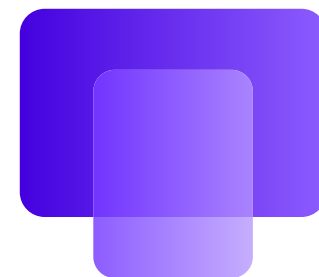

Long recognized for providing industry-leading solutions

The Omnissa platform is built on the products Workspace ONE and Horizon, providing solutions across:

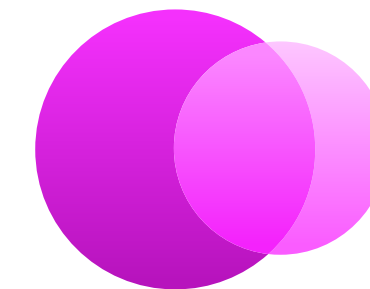

Virtual desktops and apps (VDI)

The Horizon suite features a modern, industry-leading solution for secure delivery of virtual desktops and apps – whether on-premises, in the cloud, or hybrid/multi-cloud.

Unified endpoint management (UEM)

Workspace ONE Unified Endpoint Management (UEM) is an industry-leading solution designed to streamline IT operations and costs and eliminate overhead in managing diverse endpoints – whether mobile, desktop, rugged, or virtual.

Digital employee experience (DEX)

The Workspace ONE suite features a comprehensive DEX lifecycle solution—encompassing delivery, measurement, analysis, and remediation—that continuously improves employee engagement and productivity and helps IT organizations shift-left.

Security and compliance

Our Security and Compliance solution helps organizations keep their endpoints secure by providing conditional access to applications and resources, proactively determining endpoint risk and remediating vulnerabilities, and integrating with 3rd party security providers for signal sharing.

Why Omnissa

Omnissa is the only digital work platform providing a truly integrated offering, with flexible deployment across public, private, hybrid, and sovereign clouds and ecosystem partnerships across major OEM and ISV vendors. We have earned the trust of customers and garnered industry recognition.

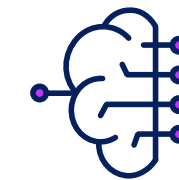

Customer trust. Trusted by over 26,000 customers, including some of the largest customers across industries:

3 of the 4
manufacturing companies
by market cap
